Note 1.The PDL02 series required a minimum 10% loading at the output to maintain specified regulation. Operation under no-load condition will not damage these devices, however they may not meet all listed specification.

2.It will not damage the device without inserting external input capacitors. There is a smaller reflected ripple current when put a capacitor at input. The capacitor recommended use "CHEMICON" LXZ series or equivalent for 05 & 12Vin. Use "CHEMICON" KMF series or equivalent for 24 & 48Vin.

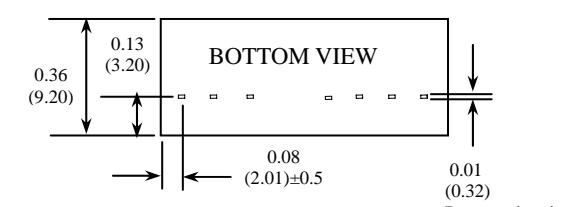

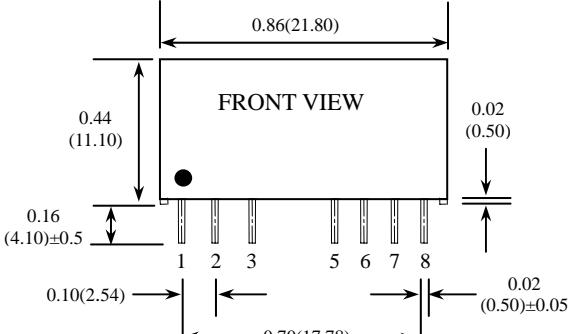

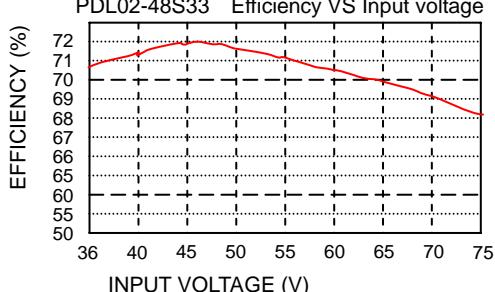

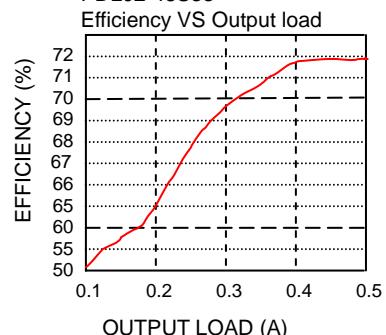

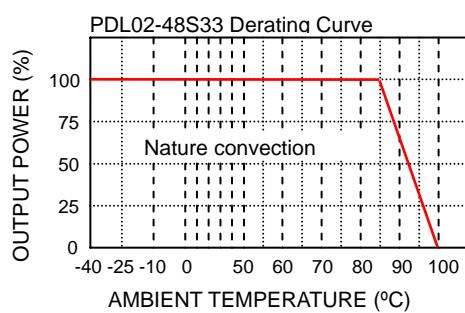

3.BELLCORE TR-NWT-000332. Case: 50% Stress, Temperature at 40°C. (Ground fixed and controlled environment).

4.The PDL02 series meet EN55022 class A with a filter at input. The filter capacitor recommended is same as note2.

5.Maximum value at nominal input voltage and full load.

6.Typical value at nominal input voltage and full load.

7.Test by minimum Vin and constant resistive load.
