110 WATTS

• EN 60950-1 ITE Certification

Optional Chassis and Cover

• One to Four Outputs

Class B Emissions per EN 55011/22

• Harmonic Current per EN 61000-3-2

REL-110 SERIES AC-DC

FEATURES:

- RoHS Compliant
- Universal 85-264 VAC Input
 EN 60601-1 Medical Certification
- High Efficiency
- Advanced SMT Design • Compact 3" x 5" x 1.3" Size • EMC to EN 61000-6-2 & EN 60601-1-2
- 2 Year Warranty
- Fits 1U Applications

Refer to Applications Information for complete output power ratings.

All specifications are maximum at 25° C, 110W unless otherwise stated, may vary by model and are subject to change without notice.

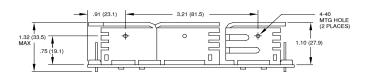

Specify optional chassis and cover when ordering.

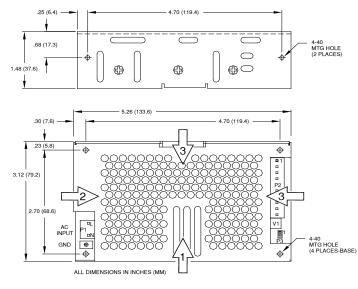

.128 DIA MTG HOLE (4 PLACES)

OPTIONAL CHASSIS/COVER

3 – Fair

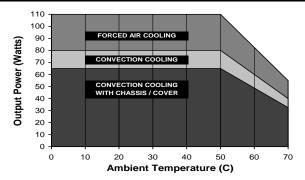

RECOMMENDED AIR FLOW DIRECTION

1 – Optimum 2 – Good

APPLICATIONS INFORMATION

- Rated 8A maximum with convection cooling 2
- Rated 16A maximum with convection cooling.
- 3. Total power must not exceed 80 watts with convection cooling on open frame models except where noted.
- 4 Total power must not exceed 110 watts with 300 LFM forced air cooling on open frame models.
- 5. Total power must not exceed 65 watts with convection cooling and chassis/cover option.
- Total power must not exceed 110 watts with 300 LFM forced air cooling and chassis/cover 6. option.
- 7. Total current from Outputs 3 & 4 must not exceed 3 amps with convection cooling.
- 8. Total current from Outputs 1 & 2 must not exceed 12 amps with convection cooling.
- 9. Semiconductor case temperatures must not exceed 110°C.
- 10 Each output can deliver its rated current but total output power must not exceed maximum power as determined by the cooling method stated above.
- Sufficient area must be provided around convection cooled power supplies to allow 11 natural movement of air to develop.
- 12 300 linear feet per minute of airflow must be maintained one inch above any point of the heatsink in the direction shown when forced air cooling is required.
- 13. This product is intended for use as a professionally installed component within information technology and medical equipment.
- 14. A minimum load of 10% is required on output one to ensure proper regulation of remaining outputs.
- 15. Remote sense terminals may be used to compensate for cable losses up to 250mV (single output models only). The use of a twisted pair is recommended as well as a decoupling capacitor (0.1 - 10μ F) and a capacitor of 100μ F/amp connected across the load side.
- 16. Peak to peak output ripple and noise is measured directly at the output terminals of the power supply, without the use of the probe ground lead or retractable tip, 20 MHz bandwidth
- This product was type tested and safety certified using the dielectric strength test voltages 17. listed in Table 6 of IEC 60601-1:2005. In consideration of Clause 8.8.3, care must be taken to insure that the voltage applied to a reinforced insulation does not overstress different types and levels of insulation. Primary and secondary to ground capacitors may need to be disconnected prior to performing a dielectric strength test on the power supply or the end product. It is highly recommended that the DC test voltages listed in DVB.1, Annex DVB of UL 60601-1 1st Edition are not exceeded during a production-line dielectric strength test of the assembled end product. Please consult factory for further information.
- 18. This power supply has been safety approved and final tested using a DC dielectric strength test. Please consult factory before performing an AC dielectric strength test.
- 19. Maximum screw penetration into bottom chassis mounting holes is .100 inches.
- Maximum screw penetration into side chassis mounting holes is .250 inches. 20
- To meet emissions specifications, all four mounting hole pads must be electrically 21.
- connected to a common metal chassis. Chassis/cover option recommended. 22 This product includes only one fuse in the input circuit. In consideration of Clause 8.11.5 of IEC 60601-1:2005, a second fuse may be required in the end product

MAXIMUM OUTPUT POWER VS. AMBIENT TEMPERATURE
